

**Existing and prospective opportunities
of State Joint Stock Railway Company
«Uzbekistan railways» for the
implementation of transportation of
the processed fruit and vegetable
products by railway**

The main activities of the company are:

- ❖ forwarding and shipping of goods by railway;
- ❖ repair and maintenance of railway wagons;
- ❖ passenger and tourist transportation ;
- ❖ maintenance, upgrading of locomotive and wagon park.

Handling of fresh fruit and vegetable products shipment provided by JSC «Yo'lRefTrans»

For the transportation of processed fruit and vegetable products by the railway there are necessary specialized rolling stocks:

- 1534 cars, of which 211 five refrigerated sections CB-5;
- 260 wagons thermoses;
- 211 service wagons;
- 4 glaciers.

JSC «Yo'lRefTrans» established, officially authorized, introduced and maintained in working order system of quality management ISO 9001-2008, directed to ensuring stable quality repair of the refrigerator rolling stocks and keep quality of food during their transportation.

JSC «Yo'IRefTrans» provides a range of transportation services, associated with the delivery of goods in international traffic:

- Freight transportation to land and sea ports, CIS hubs and overseas.

- At the stations simultaneous loading carried out into refrigerated section, while passing custom procedures (registration, inspection) on site.

- Freight wagons for loading submitted on clients request, long and shortened refrigerator sections, with 2, 3 and 5 freight wagons.
- Annual transportation opportunity of fresh and processed agricultural products up to 1 million tons.
- Ensuring the regularity of service, regardless of the weather conditions and time of the year.

Control is practised to promote refrigerated sections for loaded and unloaded conditions outside of the State Joint Stock Railway Company «Uzbekistan railways»

Additional preferences for the transportation by railway transport

- For the transportation of fresh fruit and vegetable products forwarded to the railway stations of the CIS railway administrations, participants of tariff agreement of the CIS countries, Georgia, Estonia and Latvia, in refrigerated rolling stock there is applied rate at coefficient 0.60;
- when transportation in refrigerated sections from five wagons and one diesel generator tariff rate applied at coefficient 0.85;
- when transportation of export perishable goods on State Joint Stock Railway Company «Uzbekistan railways» transported at the distance more than 100 km, in refrigerator wagons tariff rate applied at coefficient 0.75.

To maintain good technical condition of the rolling stock of the JSC «Yo'lRefTrans» there is a production centre for:

- Repair and restoration of diesel plants;
- Repair and restoration of refrigerators;
- Production of insulation tubes;
- Repair and restoration of diesel power plants, etc

Thank you for attention !
