

FranceAgriMer is a State agency established under the Ministry of Agriculture for agricultural and fishing products.

FranceAgriMer is a centre for resource, exchanges, definition of strategy and management of the French agricultural and fishing sectors.

FranceAgriMer mandate :

Its goal is to support the improvement of the economic performance of the various sectors, while respecting the environment, with a particular attention paid to exports, so that the French agricultural and fishing sectors rise to the challenges they are confronted with.

FranceAgriMer, provides the following services:

- monitoring markets and providing economic expertise to support the operators within the different agricultural and fishing sectors, to help them improving and developing their strategies;
- organising the dialogue, consultation and implementing of government policies within the eleven advisory committees of the sectors;
- encouraging cooperation of the producer organizations in the regions;
- managing the national and European market regulatory schemes;
- contributing towards technical cooperation and increasing the international presence of the sectors.

Support producers' organisation and "interprofessions"

FranceAgriMer is the place where producers, users, operators and public authorities exchange and work together, in each sector.

FranceAgriMer has set up 11 specialized councils (one for each sector / industry: sugar, wine, fisheries, cereals, fruits...), with 19 to 42 members, appointed for three years, representatives of the State, the industry and the agricultural producers.

FranceAgriMer provides support to producers to organize themselves into professional associations, federations and interprofessions.

The purpose of this activity is to define the main stakes and contribute to build a single French position in each sector.

Trade support unit

FranceAgriMer has a monitoring of the technical and health regulations by the import countries of the French exports and send these information to the French agricultural professionals.

FranceAgriMer maintains the website Exp@don which provides information about the exports of animals, animal genetic, vegetables, vegetal genetic, fruits....

FranceAgriMer contributes to set up actions for negotiations in the field of sanitary and phytosanitary (SPS) trade barriers, in coordination with the French plant and animal health authorities, and the professionals.

FranceAgriMer organises the audit mission by the authorities of foreign countries in the field of plant and animal health negotiations (agreement of the plants, audit of the French plant and animal health control system...)

FranceAgriMer provides a technical support to the agricultural interprofessions or federations helping them to export.

FranceAgriMer promotes the French model for markets organisation and plant and animal health control system.

Caroline Lemaitre, agricultural and environmental engineer

Adviser for plant genetics and vegetal products.
